CSD/DSD Split-Drive Anchors

The Split-Drive anchor is a one-piece expansion anchor that can be installed in concrete, grout-filled block and stone. As the anchor is driven in, the split-type expansion mechanism on the working end compresses and exerts force against the walls of the hole.

Features

- Available in countersunk (CSD) and duplex-head (DSD) styles
- · DSD anchor can be removed with a claw hammer for temporary applications

Material: Carbon steel

Coating: Zinc plated; mechanically galvanized

Installation

Warning: Industry studies show that hardened fasteners can experience performance problems in wet or corrosive environments. Accordingly, use these products in dry, interior and non-corrosive environments only.

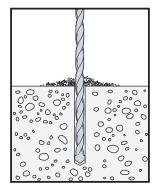

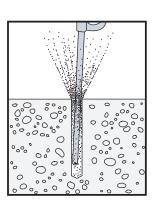

Caution: Oversized holes in the base material will greatly reduce the anchor's load capacity. For CSD, embedment depths greater than 11/2" may cause bending during installation.

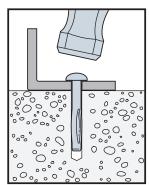

- 1. Drill a hole in base material using a 1/4"-diameter carbide-tipped drill. Drill hole to specified embedment depth and blow clean using compressed air. Overhead installation need not be blown clean. Alternatively, drill hole deep enough to accommodate embedment depth and dust from drilling. Position fixture and insert split-drive anchor through fixture hole.
- 2. For CSD, %"-diameter fixture hole is recommended for hard fixtures such as steel. For DSD, 5/16"-diameter fixture hole is recommended.
- 3. Drive anchor until head is flush against fixture.

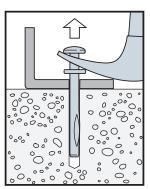

Installation Sequence

DSD anchor may be removed with a claw hammer.

CSD/DSD Product Data

| Size | Model | Head Style/Finish | Drill Bit Diameter | Quantity | | |
|-------------|------------|---|--------------------|----------|--------|--|
| (in.) | No. | neau Style/FilliSil | (in.) | Вох | Carton | |
| 1/4 x 1 1/2 | CSD25112 | | | 100 | 500 | |
| 1/4 x 2 | CSD25200 | Countersunk head – Zinc plated | 1/4 | 100 | 500 | |
| 1/4 x 21/2 | CSD25212 | | | 100 | 500 | |
| 1⁄4 x 3 | CSD25300 | | | 100 | 400 | |
| 1/4 x 31/2 | CSD25312 | | | 100 | 400 | |
| 1/4 x 4 | CSD25400 | | | 100 | 400 | |
| 1⁄4 x 3 | CSD25300MG | Countersunk head – Mechanically galvanized ¹ | 1/ | 100 | 400 | |
| 1/4 X 4 | CSD25400MG | Countersunk nead — wechanically galvanized. | 1/4 | 100 | 400 | |
| 1/4 x 3 | DSD25300 | Duplex head – Zinc plated | 1/4 | 100 | 400 | |

^{1.} Mechanical galvanizing meets ASTM B695, Class 55, Type 1. Intended for some preservative-treated wood sill plate applications. Not for use in other corrosive or outdoor environments. See p. 235 for details.

CSD Allowable Tension and Shear Loads in Normal-Weight Concrete

| | D.:/// D'A | Fushad | | Minimum | Tensio (II | n Load o.) | Shear Load (lb.) | | |
