The Indoor Architectural Products PSPC is a precut strap designed for ornamental applications. This strap supports heavy, concentrated loads by creating a strong connection between wood members. The load-rated PSPC is part of our Classic Collection, featuring modern smooth edges and clean lines. The powder-coat finish on the PSPC provides a decorative look in applications where the connector is visible.

Key Features

- Installs with machine bolts
- Designed to resist wind and seismic forces

Material

- 7 ga.

Finish

- Black powder coat
